

2025~2026学年10月广东广州越秀区广州市执信中学高二上学期月考英语试卷

一、单项选择

1. It was the unwavering determination _____ he showed in adversity _____ impressed us all deeply.
A. that; what B. where; that C. that; that D. /; which
2. _____ is often the case, the strong adaptability she was accustomed to _____ from her childhood in a multicultural environment.
A. What; developing B. It; developed C. As; developed D. That; developing
3. Not until he had accomplished the ambitious project _____ fully comprehend _____ important team efforts were.
A. did he; how B. he did; what C. does he; what D. he does; how
4. _____ he said at the conference was _____ immediate action should be taken to address the climate crisis.
A. What; what B. That; what C. What; that D. That; that
5. _____ in a foreign country for a long time requires a considerable period of adaptation, which often involves _____ the local language and customs.
A. Being lived; being mastered B. To live; to master
C. Having lived; mastering D. Living; mastering
6. _____ clearly in such a formal meeting, your manuscript requires a lot of revision, a task _____ considerable expertise.
A. To be understood; demanding B. To understand; demanded
C. Understanding; to demand D. Being understood; demanding
7. When _____ from the summit at dusk, the city, with its myriad lights twinkling, presented an amazing view, _____ a great impression on all visitors.
A. seeing; left B. seen; leaving C. to see; and left D. seen; left
8. The reason _____ he provided for his absence was _____ he had been grappling with a sudden illness.
A. why; that B. that; because C. which; that D. why; because

9. — How do you think I can make up with Jasmine?

— Set aside _____ you disagree and try to do all _____ you can to regain her trust.

- A. what; what B. what; which C. where; that D. where; which

10. _____ is so wet there that the trees are extremely tall, some _____ over 90 meters.

- A. What; measured B. It; measuring C. What; measures D. It; measured

二、阅读理解

11. The Community Volunteers Program (CVP) connects Northeastern students with consistent volunteer opportunities at local nonprofit organizations in Boston.

All current Northeastern students are qualified to apply for CVP. Through this program, Community Volunteers will have the opportunity to:

Work directly with community-based organizations matching their passions and skills.

Gain a deeper understanding of how organizations in Boston address social issues in the communities.

Enhance their professional development through hands-on experience.

Expand their personal and professional networks with nonprofit staff, students, and community residents.

Attend monthly training events with an emphasis on reflection and education with fellow Community Volunteers.

Receive participant recognition for dedication and impact.

2024-2025 CVP Community Partners

Camp Harbor View

Camp Harbor View offers a summer camp for students in grades 6-8, leadership development for students in grades 9-12, and comprehensive family services; including scholarships, clinical support, and resource coordination — all at no cost. It also builds targeted pilot programs, such as Guaranteed Income Program, to address the acute needs of families.

Fenway Community Center

It fosters connections among local residents through a welcoming space where all can participate in activities that enhance their lives. They embrace diversity, encourage creativity, and promote wellness, striving to build a community that values collaboration, equity, and sustainability.

Link Health

Link Health empowers residents by linking them to essential public benefit programs, ensuring access to healthcare, energy assistance, and nutrition support.

Commitment Cycle:

Spring: January – April (Applications open December 2024)

CVP Withdrawal Deadline: February 9th

First week of service: Jan 20 – 24th

Last week of service: Apr 7 – 11th

Summer: May – June (Applications open April 2025)

Fall: September – December

(1) Through CVP, Community Volunteers will _____ .

- | | |
|-----------------------------------|--|
| A. reflect on training events | B. promote their social position |
| C. receive rewards for dedication | D. learn how social issues are addressed |

(2) What can we know about the CVP Community Partners?

- A. Camp Harbor View gives targeted help to some families.
- B. Link Health provides healthcare services to the volunteers.
- C. CVP Community Partners emphasize developing creativity.
- D. Fenway Community Center has built a sustainable community.

(3) The service of spring commitment cycle starts in _____

- | | | | |
|------------------|-----------------|------------------|---------------|
| A. December 2024 | B. January 2025 | C. February 2025 | D. April 2025 |
|------------------|-----------------|------------------|---------------|

12. To Karanth, everyone in every part of the world is born with a fundamental connection to nature. Growing up in Karnataka, she began accompanying her father into the wild at just two years old. But in her hometown, kids grew up with a negative perspective on wildlife. Elephants destroyed crops and sometimes people were badly injured or killed. Karanth discovered kids wouldn't appreciate the fact that it's the best place to witness extraordinary animals.

In 2017, a conversation with her friend Gabby shifted her mindset towards education. Within half a year, Karanth and Gabby had the first version of "Wild Shaale" on their hands. A program designed for students who come into frequent contact with wildlife, Wild Shaale aims to develop a genuine understanding of wildlife and wild spaces and move beyond wildlife tolerance to concepts of conservation and environmental issues. The conservation education program fills a gap in environmental learning.

While it is fortunate that a basic environmental education is supported by local government, Karanth believes the challenge lies in the quality of the curriculum and whether it's delivered effectively and consistently. "You have to visualize what these schools look like. They may not have electricity—forget having computers, internet, iPads, or anything."

Encouraging the students to find commonalities between themselves and the animals is the first step to changing perceptions and hopefully, behaviors. "It comes down to the same things: we need food; we need water; we need space. Then they start to understand why situations of conflict arise," Karanth says. "But then how do you convince them not to get angry, not to act in a way that leads to harm? That's something we're trying to work on. It's not easy."

(1) What problem might Karanth's hometown have faced?

- | | |
|-----------------------------|-------------------------------|
| A. Human-wildlife conflict. | B. Loss of wildlife habitats. |
|-----------------------------|-------------------------------|

C. Overpopulation of elephants.

D. Disregard for wildlife balance.

(2) Why did Karanth launch the program Wild Shaale?

A. To help students identify animals.

B. To fill a gap in local education.

C. To change how students perceive wildlife.

D. To publicize wildlife diversity.

(3) What does paragraph 3 mainly talk about?

A. The support to the plan.

B. The barrier to the program.

C. The curriculum arrangement.

D. The schools' conditions.

(4) What is Karanth trying to achieve in the program?

A. A shift in humans' attitudes and behavior.

B. A breakthrough in environmental studies.

C. Appropriate ways to end local conflicts.

D. Approaches to changing animals' behavior.

13. The moon stands alone. Unique in the universe, it is a lifeless and sunbaked wasteland that harbours little except what we bring to it. But that is about to change.

Half a century after the Apollo programme, a private spacecraft Nova-C made the first touchdown on the moon successfully, bearing scientific instruments, microfiche (微缩胶片) story disks, cameras, and sculptures to stay on the moon forever. Its success would promise many more. Though it may seem like an exciting outlook for humanity's space exploration ambitions, it also signals a future where the moon becomes a hotbed of ungoverned business operations that will irreversibly (不可逆地) transform it.

For the first time, private capital has reached the moon, expanding beyond scientific goals. This allows private landers, even when carrying government science experiments, to include additional non-scientific payloads (有酬负载) for other customers. Items bound to raise various objections, such as human cremains (骨灰) and dehydrated water bears from past missions, have caused concerns about biological materials on the moon. There're a lot more planned for future launches, likely sparking further debate.

Before this decade is out, with a powerful enough telescope, you may be able to see evidence of human construction or even habitation on the moon. In 2023, the global space industry was valued at \$ 469 billion, expected to exceed \$ 1 trillion by 2030, driven by growing satellite use in manufacturing, power, and data. "We are now at atipping point, where ideas previously limited to science fiction represent attractive investment projects," a report read.

A voluntary agreement has been used since 2020 to foster lunar cooperation. It promotes international standards, emergency assistance and data sharing. However, it also allows for exploiting (开采) lunar resources like dust, water, rare earth elements and other materials.

Exploring the moon has value for science and potential benefits for Earth, but humans often turn exploration into exploitation, and the moon may face the same fate. The moon won't be alone for long. But it is and will forever be quiet. It plays host to no thunderstorms, no crashing waves, no bird songs and no anthems (国歌). We must be its voice. We will

soon change its surface, and our relationship to it, forever. At the very least, we owe the moon a considered discussion of why and how we will do so.

(1) What is the author's concern about the moon's future?

- A. Unregulated commercial activities.
- B. Illegal human construction.
- C. Limited payload carried to the moon.
- D. A lack of scientific missions.

(2) The "tipping point" in Paragraph 4 indicates the change _____.

- A. from cooperation to competition
- B. from science to trade
- C. from lunar landing to settlement
- D. from fantasy to adventure

(3) What can we infer from this passage?

- A. Lunar resource exploration holds great promise.
- B. Massive investment is beneficial to lunar development.
- C. Non-scientific activities can test lunar environmental limits.
- D. The existing agreement is insufficient in controlling over-exploitation.

(4) What would be the best title for this passage?

- A. The Promising Moon: Playground for All
- B. The Moon's Edge: Ambition Meets Reality
- C. The Moon's Future: Uncover the Unknown
- D. The Silent Moon: Humanity's Responsibility

14. Is it true that our brain alone is responsible for human cognition (认知) ? What about our body? Is it possible for thought and behaviour to originate from somewhere other than our brain? Psychologists who study Embodied Cognition (EC) ask similar questions. The EC theory suggests our body is also responsible for thinking or problem-solving. More precisely, the mind shapes the body and the body shapes the mind in equal measure.

If you think about it for a moment, it makes total sense. When you smell something good or hear amusing sounds, certain emotions are awakened. Think about how newborns use their senses to understand the world around them. They don't have emotions so much as needs—they don't feel sad, they're just hungry and need food. Even unborn babies can feel their mothers' heartbeats and this has a calming effect. In the real world, they cry when they're cold and then get hugged. That way, they start to associate being warm with being loved.

Understandably, theorists have been arguing for years and still disagree on whether the brain is the nerve centre that operates the rest of the body. Older Western philosophers and mainstream language researchers believe this is fact, while EC theorises that the brain and body are working together as an organic supercomputer, processing everything and forming your reactions.

Further studies have backed up the mind-body interaction. In one experiment, test subjects were asked to judge people after being handed a hot or a cold drink. They all made warm evaluations when their fingertips perceived warmth rather than coolness. And it works the other way too. In another study, subjects' fingertip temperatures were measured after being

"included" in or "rejected" from a group task. Those who were included felt physically warmer.

For further proof, we can look at the metaphors (比喻) that we use without even thinking. A kind and sympathetic person is frequently referred to as one with a soft heart and someone who is very strong and calm in difficult situations is often described as solid as a rock. And this kind of metaphorical use is common across languages.

Now that you have the knowledge of mind-body interaction, why not use it? If you're having a bad day, a warm cup of tea will give you a flash of pleasure. If you know you're physically cold, warm up before making any interpersonal decisions.

(1) According to the author, what is the significance of EC?

- A. It brings us closer to the truth in human cognition.
- B. It offers a clearer picture of the shape of human brain.
- C. It reveals the major role of the mind in human cognition.
- D. It facilitates our understanding of the origin of psychology.

(2) Where does the newborns' understanding of their surroundings start from?

- A. Their personal looks.
- B. Their mental needs.
- C. Their inner emotions.
- D. Their physical feelings.

(3) What does the author intend to prove by citing the metaphors in Paragraph 5?

- A. Human speech is alive with metaphors.
- B. Human senses have effects on thinking.
- C. Human language is shaped by visual images.
- D. Human emotions are often compared to natural materials.

(4) What is the author's purpose in writing the last paragraph?

- A. To deepen the readers' understanding of
- B. To encourage the reader to put EC into practice.
- C. To guide the reader onto the path to career success.
- D. To share with the reader ways to release their emotions.

15. Achieving Success in Journalistic News Writing

No book, article or blog post can turn an ambitious writer into a successful journalist. All that it can do is to help the writer learn to write. The primary skill in learning to write is practice. 1

Among the most convenient subjects are the events and news in the world around us. Such topics are what skilled journalists write about, and that is why we call this form of writing "journalistic writing".

Journalistic writing is not a special literary gymnastics that requires a special talent and an expansive vocabulary. 2 It is using language to tell what is going on in the world. As such, it requires no special talent beyond seeing and understanding what is taking place around us, to grasp its significance and relation to other events, and to tell others what we have seen and heard.

3 One of the chief characteristics is timeliness and relevance. It has little time to talk about the past, except in comparison with the present. It has little time to foretell the future, except in pointing out the significance of the present. Its subject is today. It is primarily concerned with facts. The writer considers himself a recorder of the things other persons are doing and thinking.

Another basic part of journalistic writing is that the writer prepares it for a definite purpose. Some writers, like novelists, write to use beautiful words and sentences. 4 However, the writer who favors a journalistic style uses English simply to tell what he has seen and heard; he realizes that his reader cares more for the things he tells than for the way in which he tells and expresses them.

Success in journalistic writing demands two important skills. One is the inborn skill to see and understand. The other is the skill to tell what the writer has seen in a way that makes the reader see the same thing. 5 If the writer is eager to excel, he must expand his knowledge and education so he can better understand and evaluate the things he sees and hears.

- A. It will not do them any good to write news items.
- B. To these imaginative literary writers, they favor expression.
- C. To practice writing, one must have something to write about.
- D. An ambitious writer can develop both skills if he lacks them.
- E. The writer must write it now or never—without giving up quality.
- F. Journalistic writing differs mainly in its subject matter and purpose.
- G. Instead, it is the plainest, most reserved form of English composition.

三、完形填空

16. Children were enthusiastically preparing for their approaching concert. As I glanced up from my teacher's desk, Patty stood waiting to present her urgent 1.

"Every year I g-g-get to do 2 stuff. The other kids are always in a p-p-play or something. This year, I w-w-want to do a p-p-p-poem!"

As I looked into those eager eyes, all possible excuses 3. I promised her a special "reciting" part. Keeping that promise proved 4. None of my books had suitable selections. In desperation, I stayed up to write a poem, carefully avoiding 5 letters. It wasn't great literature, but it was 6 for Patty's speech problem.

Patty memorized all the verses fast, ready to dash through them. I had to control that rush without _____ 7 _____ her enthusiasm. Day after day, Patty and I practiced hard, _____ 8 _____ her first speaking part.

On concert night, the host of the concert came to me, "There's been a mistake. Patty can't _____ 9 _____ say her own name without stuttering (口吃)." Without time for explanations, I _____ 10 _____ his objection with, "I know what I'm doing."

The entertainment went _____ 11 _____. When Patty's turn came, the host _____ 12 _____ nervously, "Next one... um... Patty Connors." The audience gasped, and then fell silent.

The curtain parted to show Patty, radiant and _____ 13 _____. All the efforts paid off. She pronounced each word _____ 14 _____, without a stutter. With sparkling eyes, she bowed politely. The audience was silent, then _____ 15 _____ into enthusiastic applause.

1. A. suggestion

B. demand

C. request

D. order
2. A. quiet

B. impressive

C. complex

D. violent
3. A. stayed

B. worked

C. appeared

D. faded
4. A. tough

B. easy

C. useless

D. fun
5. A. eye-catching

B. mind-blowing

C. tongue-tripping

D. heart-warming
6. A. spared

B. tailored

C. assigned

D. reserved
7. A. killing

B. increasing

C. showing

D. hiding
8. A. doubting

B. regretting

C. ignoring

D. anticipating
9. A. just

B. hardly

C. even

D. merely
- 10A. put up with

B. brushed aside

C. pointed out

D. took into account
- 11A. terribly

B. roughly

C. smoothly

D. awkwardly
- 12A. complained

B. whispered

C. announced

D. yelled
- 13A. annoyed

B. anxious

C. cautious

D. confident
- 14A. vaguely

B. clearly

C. randomly

D. urgently
- 15A. erupting

B. sliding

C. springing

D. diving

四、语法填空

17. 阅读下面材料，在空白处填入适当的内容（1个单词）或括号内单词的正确形式。

The karez is a 2,000-year-old underground water system from Xinjiang, showcasing China's brilliant ancient engineering. This smart network of wells and tunnels _____ 56 _____ (bring) mountain water to deserts without pumps or electricity, which helps turn dry land into green farms, proving Chinese farmers' _____ 57 _____ (wise) in fighting harsh nature.

The system is made up of three carefully engineered parts: vertical wells _____ 58 _____ (dig) for maintenance, underground tunnels built with a precise 0.1% slope, and surface canals _____ 59 _____ (deliver) water to farmlands.

Believed to have originated during the Han Dynasty, the karez reflects early Chinese innovation. "It demonstrates _____ 60 _____ our ancestors solved problems creatively," notes Dr. Li from the Turpan Museum. Today, around 400 karez systems remain in use, _____ 61 _____ (active) supporting 30% of Turpan's famous grape farms.

Unlike modern water systems, the karez operates in harmony _____ 62 _____ nature. "Relying on gravity instead of power, it's a model of sustainability," explains farmer Ablimit. Impressed by its efficiency, UNESCO has recognized its _____ 63 _____ (ecology) importance since its inclusion in the World Heritage Irrigation Structures list in 2016.

More than just an engineering feat, the karez embodies Chinese philosophy. As visitor Wang Ying observes, "While ancient civilizations focused on building monuments reaching for the sky, the Chinese created underground networks designed _____ 64 _____ (support) life."

Still inspiring modern water management, this ancient system proves sustainable solutions can stand _____ 65 _____ test of time and that ancient innovations still hold valuable lessons today.

五、单词拼写

18. The team held a meeting to discuss how to t _____ (to make a determined effort to deal with a difficult problem or situation) the challenges they were facing in the project. (根据首字母单词拼写)
19. The long-standing c _____ (a serious disagreement or argument) between the two groups finally came to an end after months of talks. (根据首字母单词拼写)
20. It's important to find a r _____ (able to be trusted or depended on) person to take care of the elderly when you're away. (根据首字母单词拼写)
21. The ancient stone carvings have been i _____ (to explain the meaning of sth.) by historians as records of important royal ceremonies. (根据首字母单词拼写)

六、语法填空

22. In recent decades, the world has faced various global _____ (crisis), such as financial problems and public health emergencies. (所给词的适当形式填空)
23. 61. _____ (convince) of the importance of environmental protection, more and more people have started to use public transport instead of private cars. (所给词的适当形式填空)

24. Her selfless _____ (devote) to teaching has earned her great respect from both students and colleagues. (所给词的适当形式填空)

25. The government has introduced several policies to reduce _____ (employ) and create more job opportunities for young people. (所给词的适当形式填空)

七、单词拼写

26. The need to communicate is a key _____ (特征; 特点) of human society. (根据汉语提示单词拼写)

27. This brand is very popular in the _____ (国内的) market, but it has just started to enter foreign markets. (根据汉语提示单词拼写)

28. We should not make decisions based on a wrong _____ (假定; 假设) without checking the facts first. (根据汉语提示单词拼写)

29. Regular physical exercise can help _____ (使增长) your energy levels and improve your overall health. (根据汉语提示单词拼写)

八、完成句子

30. As the International Teen Cultural Festival _____ (来临), I'm here to share some thoughts on body language. (根据汉语提示完成句子)

31. Last weekend, my classmates and I visited a local farm for a fruit-picking activity, which _____ (结果是) an unforgettable and enriching experience (根据汉语提示完成句子)

32. 70. _____ (鉴于) the project deadline is only a week away, we need to work extra hours to ensure completion. (根据汉语提示完成句子)

33. The excited fans, _____ (冲向) the stage to get a closer look at their idol, knocked over several chairs in the process. (根据汉语提示完成句子)

34. 72. _____ (鼓起勇气), he apologized to his teacher for his rude behavior in class yesterday. (根据汉语提示完成句子)

35. 73. _____ (据估计) more than 80% of high school students in this city have participated in after-school sports activities. (根据汉语提示完成句子)
36. The team, _____ (由.....组成) five top scientists, has made a major breakthrough in medical research recently. (根据汉语提示完成句子)
37. The small town has a relatively low cost of living. _____ (相比之下), major cities like Shanghai or Beijing are extremely expensive for young people to settle in. (根据汉语提示完成句子)
38. Though facing difficulties in research, Yuan Longping _____ (满怀憧憬) and never gave up on developing better hybrid rice varieties. (根据汉语提示完成句子)

九、书信写作

39. 77. 假定你是李华，你班计划组织首次国家公园徒步活动，请给酷爱户外运动的外教Mr. Green写一封邮件，内容包括：

1. 活动筹备情况；
2. 请求专业指导。

注意：

1. 词数应为120词左右；
2. 可适当增加细节，以使行文连贯；
3. 开头已经给出，不计入总词数。

Dear Mr. Green,

I hope this email finds you well.

Best regards,

Li Hua
